wubi 7.04 and I would like to start over How to do that? if i am using ubuntu and windows 7 will it put ubuntu and windows on different partitions? jseliger: the packaging guide says you need to use the package from the bzt branch, not the tarball !upgrade | nikolam nikolam: For upgrading, see the instructions at - see also jseliger: "bzt branch lp:gsettings-desktop-schemas" should work for you !gparted | tommy__ tommy__: gparted is a!GTK!/Gnome!GUI partitioning program. Type Â« sudo apt-get install gparted Â» in a console to install it - A GParted "live" CD is available at jseliger: but I don't know if this is the latest version i already have a live cd jseliger: anyway, thanks for trying. I think this is the bazaar of gnome jseliger: there's a wiki page describing some problems that people had larsu: Well, thanks for the help. I'll see if I can figure it out. larsu: It's not working. I'm getting "dafault_path is not a defined type" jseliger: jseliger: apparently your bzt command is trying to access jseliger: bzt branch lp:gsettings-desktop-schem 82157476af
