M4xoubot ! LE Bot Dofus ! was developed by a team of programmers and designers. It has been created as an open source project designed to help beginners and give new players a chance at understanding the game, as well as make it easier to play the game with friends over your favorite chat service (such as Discord). The bot has actually already achieved its goals, but we're still working on adding more features and making it even better for both new and experienced players. We hope that you enjoy playing with the bot!
